

INFORMATION FOR AUTHORS

Fusion Science and Technology, a research journal of the American Nuclear Society, publishes original research and review papers on fusion plasma physics and plasma engineering, fusion nuclear technology and materials science, fusion plasma enabling science technology, fusion applications, and fusion design and systems studies. Authors are encouraged to submit complete papers of work summarized in the *Transactions of the American Nuclear Society* and in other proceedings. Concise versions of detailed reports of limited distribution will also be considered.

Fusion Science and Technology publishes Technical Papers, Technical Notes, Critical Reviews, Book Reviews, Meeting Reports, and Letters to the Editor. Technical Notes report preliminary results and extensions of previously reported work. Technical Papers and Notes and Critical Reviews are reviewed for technical content. Letters to the Editor provide an expeditious medium for comments for editorial policies and for discussions on the content of other contributions.

Author rights under Copyright Law are transferable to the American Nuclear Society. These rights, as well as author responsibility for protecting proprietary and third-party rights, are specified in the author-ANS agreement to be made before publication. All materials accepted for publication are protected by copyright obtained by ANS.

Authors are informed of the partial cost of publication—reflected in a page charge based on manuscript length. Manuscripts accepted by the Editor are published without regard to page charge payment; however, this source of revenue is essential in maintaining the Society's journal publishing services. Authors receive a PDF file of published material upon payment of page charges. Publication of manuscripts unsupported by page charge payment is necessarily limited, and some delay in presentation may occur. (The currently estimated compensation rate for the author-related costs of publishing is \$165 per published page; however, authors who include an electronic file or diskette/CD-ROM of their revised manuscript will be billed at \$80 per published page.)

Manuscripts should be submitted electronically as WORD and PDF files
(if electronic submission is not possible, send two copies) to:

Dr. Nermin A. Uckan, Editor, *Fusion Science and Technology*
c/o American Nuclear Society, 555 North Kensington Avenue
La Grange Park, Illinois 60526, USA
Telephone: (708) 579-8312; Fax: (708) 579-8313; E-mail: fst@ans.org

Manuscripts originating in Asia may be submitted to:

Dr. Yasuo Shimomura, Associate Editor, Asia
Naka Fusion Research Establishment, JAERI
801-1 Mukoyama, Naka-machi, Naka-gun
Ibaraki-ken 311-0193, Japan
Telephone: 81-29-270-7773; Fax: 81-29-270-7775

Manuscripts originating in Europe may be submitted to:

Dr. Roberto Andreani, Associate Editor, Europe
EFDA Close Support Unit—Garching
Max-Planck-Institut für Plasmaphysik
Boltzmannstr. 2, D-85748 Garching, Germany
Telephone: 49-89-3299-4212; Fax: 49-89-3299-4198

INSTRUCTIONS FOR MANUSCRIPT PREPARATION

GENERAL STYLE: Authors are referred to any recent issue for examples of format and general style and are advised to consult the 1990 edition of the style manual prepared by the American Institute of Physics (*AIP Style Manual*). Use of technical terms as defined in the American Nuclear Society *Glossary of Terms in Nuclear Science and Technology* is encouraged. Manuscripts should be submitted electronically as WORD and PDF files (if electronic submission is not possible, submit manuscript on diskette/CD-ROM). Instructions for preparation of the electronic file (or diskette/CD-ROM) will be sent to authors when the manuscript has been accepted for publication.

ABSTRACTS: The abstract should be typed on a separate page (complete with the title and names of the authors). The abstract should not exceed 200 words.

TEXT: Manuscripts must be typed, double spaced, on one side of the page with wide margins and indented paragraphs. Each manuscript must be complete with figures, tables, references, etc. (if electronic submission is not possible, two hard copies are required). The first page must contain the title, the name and affiliation of each author, the name and complete mailing address of the person to whom proofs and the page charge invoice are to be sent, and a list of the total number of pages, tables, and figures. Please provide an E-mail address and/or a fax number. The second page of a technical paper and of a technical note must contain the abstract.

UNITS: Use SI units. Conventional (non-SI) quantities may follow parenthetically if the author desires.

REFERENCES: Citations in the text to references shall be numerics strictly in order of their first appearance. References must be in the format of the *AIP Style Manual* (see recent issues of *Fusion Science and Technology* for examples). In particular, proceedings references must indicate the location and date of the conference, and references to reports must indicate the full name of the organization where the report was prepared. Also, authors are strongly encouraged to supply the full titles for the respective references. References must be listed in numerical sequence, double spaced, on a separate page.

FOOTNOTES: Footnote citations in the text should be lower-case superscript letters. These footnotes, appropriately lettered and double spaced, should be listed consecutively on a separate page. Footnotes in tables are also cited by lower-case superscript letters. These footnotes should be placed at the bottom of the table.

TABLES AND FIGURES: Tables and figures should be designed to fit one- or two-column widths (85 and 173 mm, respectively). The height of lower-case letters should not be less than 1.5 mm after reduction; thus, a figure or a table that must be reduced to one-third its original size should have lower-case letters at least 4.5 mm high. Each table must be typed on a separate page, numbered consecutively with Roman numerals, and must have a complete title. In addition to submitting hard-copy figures, authors are strongly encouraged to submit figures in a high-resolution electronic format. Preferred formats include: TIFF (line drawings at least 600 dpi, halftone or greyscale images at least 300 dpi); EPS (with embedded fonts); Postscript or PDF (with embedded fonts). Lines and rules in figures should be at least 0.5 points (half-point rules) with an absolute minimum 0.25 points. Figures should be printed on separate pages following the text, rather than being inserted in the text. Figures should be consecutively numbered in Arabic numerals in the order they are called out in the text. A descriptive caption must be prepared for each figure, and all figure captions should be typed, double spaced, on a separate page. Each figure should be labeled in the margin or on the reverse with the manuscript title, author's name, and figure number. Label each diskette/CD-ROM with the author's name, manuscript number, and the figure numbers that it contains. The journal does not have the capability to print color figures at this time. Color figures and material that will not reproduce satisfactorily will be returned to the author for reworking prior to publication.

MATHEMATICS: All mathematical equations should be carefully written and checked so that a compositor can follow the copy easily. Greek letters, upper- and lower-case letters, superscripts, subscripts, vectors, and matrices should be identified in the margin. When Greek letters are handwritten, they should be spelled out when they first appear. Equation numbers should be Arabic numerals enclosed in parentheses in the right-hand margin.

PROOFS: Proofs of all material except letters to the editor will be supplied. Proofs are to be read carefully and all printing errors corrected; however, alterations from the original text that cost more than 10% of composition costs are chargeable to the author.

REPRINTS: The author will receive a PDF file gratis when the page charge is paid; instructions on use will be provided. Hard-copy reprints may be purchased and ordered at the time the author approves the proofs.
